Full-stack developer pursuing MCA with industry experience building production-grade platforms and SaaS products. Experienced in collaborating across teams, translating requirements into scalable solutions, and delivering business-focused outcomes. Strong interest in technology transformation, product thinking, and solving real-world business challenges.

EDUCATION

Uttaranchal University

Masters in Computer Application

Dehradun, Uttarakhand

Aug. 2024 – Present

GGSIPO

Bachelors in Computer Application

New Delhi

Aug. 2021 – July 2024

EXPERIENCE

Associate Software Engineer (Full-Stack)

Sept 2025 – Dec 2025

Recogsnap Technology Pvt. Ltd.

Noida

- Developed and delivered production-grade modules for enterprise monitoring platforms handling real-time system analytics and alerts.
- Built and optimized REST APIs and backend workflows, improving data processing efficiency and reducing latency across critical endpoints
- Improved UI performance of company's website and system reliability by fixing production issues and optimizing frontend-backend interactions.
- Collaborated with cross-functional stakeholders to convert business requirements into production-ready features and measurable improvements.

PROJECTS

API Monitoring SaaS | *Node.js, Express, PostgreSQL, Prisma, Next.js, Tailwind, git*

[Live Link](#)

- Architected and developed a SaaS-based API monitoring platform supporting multi-project tracking with uptime, latency, and failure analytics.
- Built a scheduler-based monitoring engine executing automated health checks at scale, enabling continuous API observability.
- Designed a safe monitoring mechanism for non-idempotent APIs, preventing unintended database mutations in client systems.
- Implemented secure authentication-aware monitoring (Bearer Token, API Key) for protected production APIs
- Engineered persistent logging and analytics system for historical performance tracking and debugging insights.

NPM Package - RBAC Auth | *Node.js, Express, git, NPM*

[Live Link](#)

- Developed and published a reusable RBAC middleware for Express.js, simplifying authorization logic in backend systems.
- Designed for plug-and-play integration with JWT-based authentication systems.
- Managed complete npm lifecycle including versioning, publishing, and package optimization.

Service Marketplace Backend | *Node.js, Express, PostgreSQL, Razorpay, Git*

[GitHub Link](#)

- Designed a robust backend architecture with role-based access control (RBAC) supporting multiple user roles (User, Vendor, Admin).
- Implemented secure payment workflows using Razorpay, including webhook validation and cryptographic signature verification.
- Ensured data consistency and reliability using database transactions, preventing duplicate and inconsistent states.
- Built a strict order lifecycle system with enforced business rules at API level.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python

Backend: Node.js, Express.js, PostgreSQL, Prisma, MongoDB, Mongoose, SQL, REST APIs, Payment Integration

Security Validation: JWT, bcrypt, Zod, Git

Frontend: React.js, Next.js, Angular, Tailwind CSS

Collaboration: Cross-functional Collaboration, Requirement Analysis, Agile Development
